## Getting Started

### How to Install BidPanther

To properly use BidPanther, you will need the latest version of [Google Chrome](#) or [Mozilla Firefox](#) installed on your computer. Using these browsers makes BidPanther 100% undetectable to QuiBids.

**Pro Tip:** By signing into Chrome using your Google Gmail account, your browser will stay synced with any computer you use! This feature allows BidPanther to load on all of your computers with Chrome installed.

### Technical System Requirements

To properly proceed, please make sure you:

1. Download and install the latest version of [Google Chrome](#) or [Mozilla Firefox](#)
2. Visit [BidPanther.com](#) and follow the download instructions to install BidPanther

**Pro Tip:** Be sure you have cookies enabled and you are not running any ad blocking software like adblock or Pivdog. These programs have been known to interfere with BidPanther.

### New User Registration

1. Visit [BidPanther.com](#) to register for a BidPanther Pro or BidPanther Basic account
2. When properly set up, Visit [QuiBids](#) and click on an auction.
3. When the BidPanther auction window opens, enter your Login details. You can now start bidding!

### Upgrading from BidPanther Basic

1. If you currently have a BidPanther Basic account you can upgrade to a Pro account by logging into [Bidpanther.com](#), clicking account management, selecting a package and entering your payment info.

2. Once complete, Visit [QuiBids](#) and click on an auction.
3. Once BidPanther loads into the auction window, enter your Login details.
4. The window will now show you are using BidPanther Pro granting you access to all BidPanther features.

**Pro Tip:** Once BidPanther has successfully been installed, you can view live auctions from a drop down list in the upper right corner of your browser.

**\*\*Note:** After upgrading to BidPanther Pro from a Basic account, you may need to clear cookies and cache your browser before you can successfully access BidPanther Pro.

#### How to Clear your Cookies and Cache in Chrome:

1. Open your Chrome browser
2. In the upper right corner of the browser, click the 3 horizontal bars
3. Then click *Settings* followed by *History*
4. Select cookies and cache then click *Clear History*
5. Restart Chrome, navigate back to a QuiBids auction, and Login again.

#### How to Clear your Cache in Mozilla Firefox:

1. Open your Firefox browser
2. In the upper right corner, click on the *Menu* button
3. Select *Options*
4. Choose the *Advanced* tab
5. Click on *Network* tab
6. In the *Cached Web Content* section, click *Clear Now*.

#### How to Clear your Cookies in Mozilla Firefox:

1. Open your Firefox browser
2. In the upper right corner, click on the *Menu* button
3. Select *Tools*

4. Click on *Options* then
5. Choose the *Privacy* tab
6. Uncheck the box that says “Accept Cookies from Sites”

**Pro Tip:** Increase your buying power - sign up for a Quarterly, Semi-Annual, or Annual Package and save over the monthly rate!

### Uninstall BidPanther in Chrome

1. Open Chrome
2. In the upper right corner of the browser, click the 3 horizontal bars
3. Click *Settings* followed by *Extensions*
4. Click the trash can next to the BidPanther Extension
  - a. BidPanther can also be disabled by unchecking the BidPanther selection box

### Uninstall BidPanther on Firefox

1. Open Firefox
2. In the upper right corner, click *Menu* and select *Add-ons* to open the Add-ons Manager tab.
3. Select the *Extensions* or *Appearance* tab
4. Select BidPanther and click *Remove*
  - A. Unmark the BidPanther button to disable
5. Click **Restart now** when it pops up to save your tabs

You can follow the same steps to enable the same extension later. You can however permanently remove BidPanther from Firefox;

- i. On the menu button, choose Add-ons, then Add-ons Manager tab
- ii. Select Extension or Appearance panel
- iii. Select BidPanther and click the Remove button
- iv. Click **Restart now** when it pops to save your save and restore your tabs.

**Note:** There are two BidPanther versions: BidPanther Basic and BidPanther Pro. BidPanther Basic is 100% free to use and compatible with QuiBids TOS. BidPanther Pro users who opt to cancel their subscription can still keep their Basic accounts for free, however a considerable number of features will be disabled. For more information, please visit <https://www.bidpanther.com/>

### Live Auctions on Anywhere on the Web

Upon successful installation of BidPanther, you can click on the icon on the far right corner of the browser to instantly view the total number of live auctions, current price of each product, number of unique bidders in the last 5 minutes and number of bids per minute. This information is available instantly; you don't have to create a BidPanther Basic or BidPanther pro accounts to access.

There are 19 live auctions right now on Quibids!  
Click any product below to visit auction

Product	Current price	Unique bidders in last 5 min	Bids / min
\$50 Shell Gift Card	\$12.66	3	15
iRobot Roomba 780 Vacuum Cleaning Robot	\$11.32	8	16
100 Voucher Bids	\$5.41	4	13
50 Voucher Bids	\$4.66	3	9
Akribas XXIV Men's Delas Skeleton Watch	\$2.96	4	14
250 Voucher Bids	\$2.86	3	16
50 Voucher Bids	\$0.66	2	11
50 Voucher Bids	\$0.82	3	18
\$10 Bass Pro Gift Card	\$0.56	3	10
25 Voucher Bids	\$0.38	5	15
25 Voucher Bids	\$0.41	4	18

Visit BidPanther.com | Get Support

**Pro Tip:** Look for auctions with less than 11 bids per minute; this is a strong indicator the auction is slowing down and may indicate it will end soon.

## Stalking Prey – Understanding your natural panther skills

## Bid Tracking Display

### Bid tracking:

Bids are continuously monitored and recorded by BidPanther servers for QuiBids auctions. This is one of the most important features of BidPanther. The moment you enter the auction, you will see the number of bids placed by every bidder displayed on the second column after the bidder's name. The third column displays the bid placed while the last column displays the nature of bid; whether a Bid-O-Matic or Single Bid. A maximum of 25 Bid-O-Matic is set before the users can be allowed to reactivate the Bid-O-Matic.

Bidding History				
auction43	49	\$7.64	S	
PJADB1954	268	\$7.63	B-268	
monjagatta	1	\$7.62	S	
PJADB1954	267	\$7.61	B-267	
auction43	49	\$7.60	S	
PJADB1954	265	\$7.59	B-265	
auction43	48	\$7.58	S	
PJADB1954	265	\$7.57	B-265	
jhaydenmd	197	\$7.56	B-181	

**Pro Tip:** To help you gauge auction demand, only bidders in the last 5 minutes of bidding are displayed as recent bidders.

### Bidder Color Legend:

Each bidder is assigned a color code depending on the number of voucher bids they have used previously to win auctions. The toughest bidders to outbid are those who use **RED**-coded meaning they have in the past used a high number of voucher bids. Furthermore, **RED**-coded bidders are more likely to overbid on auctions. On the other hand, bidders with **BLUE** codes are known to use real bids to win auctions. Unlike the red-coded ones, Blue bidders are easier to predict because the number of real bids a bidder is allowed to place in an auction is limited and controlled by QuiBids. Find the color scale and the volume of vouchers bidders use to win on the right. **Note:** Bidders who do not have a color (N/A Black) are new bidders without any history. While wins are tracked instantly, the user's voucher % is recalculated nightly.

Bidder Color Legend	
Bidder Color	% of Voucher Bid placed to win
Black	N/A
Green	Unreliable
Blue	0% - 25%
Light Blue	26% - 42%
Brown	43% - 57%
Orange	58% - 74%
Red	75% - 100%

### Researching Your Competition (Stalking):

To guide your bidding and help you form a competitive bidding strategy, you can load and view historical stats about other bidders by simply clicking on the bidders' user name in the bid counting window (to the right of the auction clock and current price). Some valuable information you can learn about the bidders from this window is the bidder's recent wins and the Real, Voucher and Total bids placed to win. Additionally you have access to bidder's overbid ratio, wins and voucher bid ratio. To view the bidder's losses click "Comments About" button and then click losses. A loss is determined when at least 1 bid is placed by a bidder in an auction but fails to win.

Item	Real Bids	Voucher Bids	Total Bids
Bust One- Limit Buster!	21	0	21
Urge Soundbrick Bluetooth Speaker	33	0	33
\$50 Home Depot Gift Card	43	21	64
Lenovo 59387313 IdeaTab S5000 7-Inch 16GB Tablet- Silver...	224	0	224
\$25 Home Depot Gift Card	21	0	21
\$25 Home Depot Gift Card + 1X Gameplay	19	0	19
Bust One- Limit Buster!	14	0	14
\$15 Home Depot Gift Card	12	0	12
Samsung Galaxy Tab 3 7" 8GB Tablet	19	0	19

**terryco7** ★★★★★  
Comments about  
Retail Won: \$3443  
Vouchers Won: 1650  
Total Wins: 126  
Overbid Ratio (1%):  
Win % (10%):  
Voucher Ratio (43%):

### Recent Wins:

These are latest wins for the bidder together with their resultant Voucher Bids and Real bids they placed to win a specific auction.

**Pro Tip:** Keep your eyes on bidders who heavily play in voucher auctions. These bidders tend to be more aggressive and may be operating with a massive voucher bankroll, watch out!

### Star Rating:

The bidder's star rating is based on the number of wins the player has.

### Comments About:

Clicking Comments about will allow you to read and post comments from/to other BidPanther users about this particular bidder using your Facebook account. You can also view other valuable information

### Retail Won:

This is fundamentally the retail value of won items by that user.

### Vouchers Won:

This is the total number of voucher bids won by the bidder. It however doesn't show the number of voucher bids the bidder might have at the moment.

### Total Wins:

To understand the level of bidder's experience, view the number of their total wins

**Pro Tip:** The majority of bidders on QuiBids (exceeding 90%) have recorded no more than 10 wins. This is likely because many purchase a \$60 bid pack, place those bids and never return.

### Overbid Ratio:

This is the percentage of time the bidder has overbid in an auction. Ex: Placing 45 bids to win 25 Voucher Bids is considered overbidding.

### Win %:

This is the number of Wins by a bidder divided by his/her number of Losses. The ratio is used to measure how good or bad the bidder is.

### Voucher Ratio:

This is the percentage of placed voucher bids to win auctions. Note that this is a very decisive number that you should pay close attention to since it determines the color codes under bid tracking. Bidders with a higher Voucher ratio are colored **RED** because they are considered impulsive while **BLUE** are more likely to be playing with real bids which prevents the player from overbidding.

**Pro Tip:** Users can use their Facebook accounts to post notes about other QuiBids users. These comments can be viewed by all other BidPanther users.

### Stalking on the fly:

BidPanther offers an even faster way to stalk your competition. Simply place your mouse over the bidder's name in the bid history window and you will see some quick stats about that bidder on the fly.

The screenshot displays a user profile for PJADB1954. At the top, it shows the user's name, a silhouette icon, a five-star rating, and their retail and voucher wins. The main section features three circular gauges: Wins at 19%, Over Bid 1 Auction Participation at 4655, and Voucher Bids at 16%. Below these are three summary boxes for First Win (Feb 2015), Auction Participation (4655, Over bid: 1), and Latest Win (May 2015). On the right, a 'Bidding History' table lists recent bids.

Bidder	Count	Price	Item
Kidrio	11	\$1.89	B-11
PJADB1954	52	\$1.88	B-52
jhaydenmd	41	\$1.87	B-41
clh13	21	\$1.86	B-21
jhaydenmd	41	\$1.85	B-41
Kidrio	10	\$1.84	B-10
clh13	20	\$1.83	B-20
Kidrio	9	\$1.82	B-9
clh13	19	\$1.81	B-19

### Win %:

This is the number of Wins by a bidder divided by his/her number of Losses. The ratio is used to measure how good or bad the bidder is.

### Voucher Ratio:

This is the percentage of placed voucher bids to win auctions. Note that this is a very decisive number that you should pay close attention to since it determines the color codes under bid tracking. Bidders with a higher Voucher ratio are colored **RED** because they are considered impulsive while **BLUE** are more likely to be playing with real bids which prevents the player from overbidding.

### Overbids:

This is the number of times the bidder has overbid in an auction. Ex: Placing 45 bids to win 25 Voucher Bids is considered overbidding. Beware of players with a history of overbidding!

### Auction Participation:

This is the number of auctions the player has placed at least 1 bid in as monitored by our servers. This number can be used as an indicator of experience.

### First Win:

This is the date when the bidder recorded his/her first auction win. You can use this to establish the period the bidder has been playing on QuiBids and their relevant level of experience.

### Latest Win:

This is the date when the most recent win by the bidder was recorded. **Note:** BidPanther updates data nightly and therefore, this might not always show the bidder's most recent win.

## Product Info Number Line

### Item Mode:

**Item Priceline** - Stats based on product name | Records: 26

Min:	Q1	Q2	Avg	Dow	Q3	Hot	Straddle	Safe Straddle	Very Hot	Max:
\$2.43	\$8.34	\$33.16	48.77	\$92.31	\$56.87	N/A	N/A	N/A	N/A	\$167.66

Clicking on Item Mode loads data for that specific item showing the most precise indicator of bidders' demand of the product. The information in Item Mode is for all of the particular related products from the very first records in the database irrespective of how old it is.

**Pro Tip:** Item Mode should always be used whenever sufficient data is available. Note that 30 is the magic number of records, and therefore, in case the records are below 30 for the item in the QBR/BidPanther database, then consider using Retail Mode instead because

most data points will be missing.

#### Retail Mode:

The calculation of products statistics in retail mode is based on the product's retail value so as to compensate for new items on QuiBids without much history. The calculations in Retail Mode cover all products in the same price range (+/- 4% of retail value) for the past two months. **Note:** For the most accurate calculations, use Item Mode.

**Pro Tip:** Retail Mode should only be used if there are less than 30 records in Item Mode.

#### Min:

Min is the minimum price the item has ever been sold for. To view the auction, just click on "Min".

#### Q1:

Q1 stands for Quartile 1. A quartile corresponds to a quarter or 25% of the observations. Put differently, Q1 is the price point at which 25% of the auctions close before it.

**Pro Tip:** Search for tight gaps between the Quartiles; Tighter gaps between Quartiles signify auction areas where bidding is straightforward. There are times when bidding in smaller Quartile gaps is better. Wider Quartile gaps indicate that the competition is usually high or bidders have higher commitment within that price range.

#### Q2 (Median):

Also known as the Median, Q2 is Quartile 2 that stands for the point where half or 50% of the auctions either close prior to or past this price.

#### AVG:

This is the product's average selling price.

**Pro Tip:** Usually, at or about the Average selling price, the QuiBids auction timer interval is decreased to 10 seconds from 15 seconds.

#### DOW:

Day of Week Average (DOW) is the average price for this specific day of the week.

**Pro Tip:** If you notice that DOW is to the left of the AVG, then it is possible that there is lower competition on this exact day and therefore ideal for bidding. On the other hand, competition of the very product is higher on that particular day if the DOW average is to the right..

**Pro Tip:** To see the Day of the week when the average is the lowest, simply login to [QuiBidsReport.com](http://QuiBidsReport.com) then search for the product. You have a complementary QBR account with every BidPanther account you have.

### Q3:

Q3 stands for Quartile 3, representing 75% of the observations. Q3 therefore is the price point where 75% of the auctions are sealed before it.

**Pro Tip:** Usually QuiBids auctions lock between Q3 and the Hot Price.

### Hot:

This is the statistically proven hot selling price point. In other words, many auctions don't advance to this point, and could indicate the likelihood of closing soon.

**Pro Tip:** If you find yourself in an auction within this price range, it is crucial that you view the bidders involved and the number of bids placed by each. While this might be a good time to place your bid, you must remain cognizant of other variables like the playing style of the other active bidders.

### Straddle:

The statistically proven Straddle Method price point can help you lower the risks of losses and bid wastage. It is at this point that most bidders are low on bids. The Straddle Method derives its name from straddling the middle point between Hot and Very Hot Prices.

**Pro Tip:**

You shouldn't expect to see auctions at or about the Straddle points on QuiBids' home page. This is because, when auctions are close to this point, QuiBids usually conceals them from their home page. Auctions at the Straddle points can only be shown if you have been viewing the auction all the time up to this point or you link directly from BidPanther. This is advantageous because it limits the number of bidders invading the auction at this point.

It is highly recommended that you get more insights on the science behind the Straddle Method; [Click Here](#) and watch the brief video below.

[View the Straddle Method in Action](#)

#### Safe Straddle:

The Safe Straddle Point gives you better winning odds, but there is a risk that the auction might close before reaching this point.

#### Very Hot:

Only a few auctions make it to this price point. By then, only a small number of normally very determined bidders are still in the game. You have to be very cautious of who is bidding if you are still in an auction at this stage. Steer clear of **RED** bidders with high BRRs; there is little chance that they will quit bidding.

#### Max (Q4):

Also technically referred to as Quartile 4, Q4 is the max recorded sells price of an auction, and this point stands for 100% of the data used in the creation of the number line. It is actually fun to just click on "Max" to view the auction as it is because most of them are crazy.

**Pro Tip:** Distribution of number line of price points will be done in a different way for every product. Some price points will be inclined to the left, right or evenly distributed as per the auctions that complete that price point. The further left the price points are inclined, the more illogical the bidding is (GamePlays, voucher auctions).

#### Item Mode vs. Retail Mode

Take note of how significantly dissimilar the price points are between the Retail and Item modes of a *15 Voucher Bids + 1x GamePlay* auction. While in retail Mode there is an average of

31¢, it is \$1.49 (more than 4 times the price) in Item Mode. The reason for this is QuiBids does not consider a GamePlay as part of the retail price and in Retail Mode BidPanther is looking at stats based on all products within that retail price range whereas in Item Mode BidPanther only looks at specific product names to make the calculations.

**Retail Mode - 15 Voucher Bids + 1x GamePlay**

Retail Priceline - All Items From \$8.64 To \$9.36											Records: 20796
Min:	Q1	Q2	Avg	Dow	Q3	Hot	Straddle	Safe Straddle	Very Hot	Max:	
\$0.01	\$0.09	\$0.20	\$0.31	\$0.44	\$0.41	\$0.67	\$0.85	\$0.91	\$1.03	\$9.01	

**Item Mode - 15 Voucher Bids + 1x GamePlay**

Item Priceline - Stats based on product name											Records: 405
Min:	Q1	Q2	Avg	Dow	Q3	Hot	Straddle	Safe Straddle	Very Hot	Max:	
\$0.01	\$0.63	\$1.28	1.49	\$1.28	\$2.05	\$2.65	\$3.23	\$3.42	\$3.81	\$9.01	

**Auction Vitals**

Retail Priceline - All Items From \$95.99 To \$103.99											Records: 1498
Min:	Q1	Q2	Avg	Dow	Q3	Hot	Straddle	Safe Straddle	Very Hot	Max:	
\$0.02	\$0.59	\$1.24	\$2.05	\$2.89	\$2.53	\$4.33	\$5.47	\$5.83	\$6.61	\$14.45	

**Max Bids:**

This is the highest number of real bids that can be placed in an auction prior to using the Buy It Now option; it is calculated by dividing the Retail price by 0.60.

**Auction Duration:**

This is the time that has elapsed from the start of the auction. **Note:** the timer only starts counting after 20 seconds from the time bidding commenced.

**Note:** In BidPanther Basic, the timer starts from the moment you enter the auction. On the other hand, BidPanther pro users can view complete Auction Duration irrespective of the time they join the auction.

#### Price Prediction:

Relying on a number of factors, the Price Prediction utilizes an intricate statistical formula to forecast the auction's price. More than 20,000 records of recently completed auctions are used to develop the formula. The auction's retail value and the total number of bidders are the two core determining factors. Others include; availability of GamePlay and/or vouchers and whether it is a speed auction. Consider the Price Prediction as a computer model that determines where the price is likely to be the moment all bids of an auction have been placed by all bidders. This number changes with the changes in auction variables.

#### When Predicted Price is Lower than Current Price

In some cases the predicted price may be lower than the current auction price which can mean a number of things.

When to bid:

It is a good sign if the auction has locked and the actual price climbs to and past the price prediction. That's because BidPanther is basing its prediction on the total number of bidders in the auction (among other things). Since the auction is locked the total number of bidders will not increase and the price prediction is estimating the ending price of the auction based on similar auctions in the past. This is a strong indicator the auction is coming to an end.

When not to bid:

If the auction has not locked then a predicted price lower than the actual price then this usually means there are either aggressive bidders, over bidding and/or a bidding war going on. Typically this will be associated with a high Bids per Minute (BPM is 17 or higher). In other words, BidPanther cannot account for irrational bidding.

**Note:** [Find more information about Price Prediction Here](#)

**Pro Tips:** You should use Price Prediction as a measure of determining an auction's general feel. You can find out auctions with the most competition by comparing predictions of related auctions.

A calculated price point to bid can also be determined by using the Price Prediction after the Hot Price when new bidders join the auction. To begin narrowing, strategically keep an eye on the gap between the actual auction price and Price Prediction, carefully noting the total number of bids placed by each of the bidders. You can now strike when it all lines up.

### Total Bidders:

This is the overall number of bidders that have placed bids in an auction.

*\*\*\*Note that, in BidPanther Basic, Total Bidders are calculated from the time you begin monitoring the auction. On the other hand, BidPanther Pro users will know the total number of bidders irrespective of the time they entered the auction and will therefore be more informed.*

### Bids per Minute (BPM):

These are the actual bids placed within the last bidding minute, and it is an amazing barometer for measuring the level of interest in the auction. Lower BPM indicates likelihood that the auction is drawing closer to closure, while higher BPM signifies that bidding is aggressive on that auction.

#### Pro Tip:

Watch out for auctions with a BPM less than 10 since it can show that the auction has low interest levels. However, you should know that some auctions that are highly priced are likely to have a low BPM at the beginning due to the higher reset interval of the auction timer.

### View Total Bid History:

2015-05-24 18:27:31	\$4.21	dglucas70	Daisy Pit by Dean Russo, Print Size, 37.25 X 45.5

If you click on the View Total Bid History, you will be shown the whole auction's bidding history and even the last time the bidders placed their bids. To the left of each bid placed there is a color indicating how quickly that bid was placed after the bid before it. The warmer the color (red, orange, etc.) the closer the bid was placed to the one preceding it.

The cooler the color (green, blue, etc) then longer amount of time has passed for that bid to be placed.

**Pro Tip:** If the auction clock counts down to below 1 second and you see several bids placed at once then likely these users are also playing with an auto-bidder like BidPanther Pro. These bids will be indicated with several red blocks indicated they were placed in rapid succession.

### Price History:

This closely resembles “Statistics” tab of QuiBids but differs in that Recent Auctions shows the newest 15 auctions chronologically listed as opposed to those shown under Statistics that are cherry picked by QuiBids. Auctions beyond the hot price are likely to be listed on statistics tab on QuiBids. Furthermore, only 10 auctions, in no particular order are listed on QuiBids statistics tab.

The screenshot shows the BidPanther Pro interface. At the top, there is a logo for Bid Panther and a message: "Good luck, [blurred name]". Below the logo, there is a navigation bar with tabs: Auction Vitals, Bidder History, Auction History, Price History (selected), Price Compare, PantherChat, and Auto Bidder. The main content area displays "Recent auctions for:" followed by a table. The table has columns for Date, Sale, Winner, and Link. The item being tracked is "Daisy Pit by Dean Russo, Print Size, 37.25 X 45.5" with an average price of \$6.94.

Date	Sale	Winner	Link
2015-05-29 06:12:01	\$48.95	radltaylor	Daisy Pit by Dean Russo, Print Size, 37.25 X 45.5
2015-05-27 22:27:28	\$5.56	HomerPJWadsworth	Daisy Pit by Dean Russo, Print Size, 37.25 X 45.5
2015-05-27 15:37:23	\$1.68	jhaydenmd	Daisy Pit by Dean Russo, Print Size, 37.25 X 45.5

## Price Compare by Amazon:

Product Name	Amazon Price	Savings	Reviews	Star Rating
Audio-Technica ATH-ANC23 QuietPoint Active Noise-Cancelling I...	\$ 45.00	\$ 4.99	1287 reviews	★★★★
<b>Amazon Matches</b>				
AudioTechnica ATH-ANC33IS QuietPoint Active Noise-Cancelling...	\$ 49.99	\$ 0.00	102 reviews	★★★
Audio-Technica ATH-ANC7B QuietPoint Active Noise-Cancelling ...	\$ 110.00	\$ -60.01	1495 reviews	★★★★
AUDIO TECHNICA ATH-ANC23BK / ATH-ANC23BK QuietPoint®...	\$ 80.87	\$ -30.88	0 reviews	

This is a new feature that was recently incorporated into BidPanther that lets users to view different products, their Amazon prices and how much they stand to save if they make the purchase from BidPanther. Users can also view the number of reviews (complete with links to Amazon) and Star ratings on these products. With Price Compare, users can form better bidding strategies because they know the true "market price" of the product they are bidding on and can also see similar products and accessories for the product they are bidding on. (View the image below). **Note:** If a match cannot be found then promotions from Amazon will be displayed based on similar search interests.

## PantherChat:

This is a new feature that was recently incorporated into BidPanther that acts like a bulletin/messaging board so BidPanther users can chat with others live. This feature is completely anonymous and lets you pick any user name you wish. By default your QuiBids avatar will be used, but you can always disable this. By clicking the box for "Auction Feed" you can place comments to others that are hidden from the main feed and can only be viewed by others using BidPanther that are viewing that auction.

**Pro Tip:** Every Friday the FreeGiftCardFriday contest is held where the best guess of the ending price of an auction wins a free gift card.

**Pro Tip:** PantherChat is a great place to find the latest QuiBids promo codes as well as chat with other players.

### QuiBids Auto-Bidder:

BidPanther sports a Quick Fire Auto-Bidder designed to place bids well under 1 second on the auction clock. How low you can set the BidPanther bid timer mainly depends on your

proximity to the QuiBids server and how fast your internet connection is so you will need to experiment. However, our tests have worked as low as 0.2 seconds but we DO NOT RECOMMEND THIS SETTING. Bidding at the last possible second allows you to only place bids if nobody else has placed one which in turn saves you bids and keeps you in the auction longer. Other settings allow you to limit the number of bids you wish to place, only bid if less than a certain number of recent bidders, prevent from being locked out of the auction, and to set max and min auction prices to bid at.

## Troubleshooting

If you are having problems getting BidPanther to work properly then we are here to help, but first review and try the following which will solve most issues.

1. Be sure you have enabled cookies for your web browser. Disabling cookies or running your browser in a privacy mode will interfere with BidPanther and will cause login problems and may disable many of the BidPanther features.
2. Please disable any ad blocking software like adblock or PrivDog. Ad blocking and privacy software can also interfere with BidPanther causing many features and/or data to not work. If your privacy software is causing the problem, but you want to keep it enabled for other internet browsing then please add BidPanther to an acceptable list of programs/extensions. You may need to add the following domains to the safe list: bidpanther.com and pantherstat.info
3. If the first two steps above do not solve your problem then please try resetting BidPanther by doing the following:

Open chrome browser and click the three horizontal lines in the upper right corner. Then click settings, then history. Now select "clear browsing history" and check the following: Cached images and files; Cookies and other site data; Hosted app data. Now click clear browsing data button. Close chrome and reopen it. Now navigate back to a QuiBids auction and login to BidPanther again.

If you continue to have problems then please visit [BidPanther.com](http://BidPanther.com) and initiate a live chat or send an email to [info@bidpanther.com](mailto:info@bidpanther.com)
